

JUST BEFORE SCHOOL STARTED

Dr. J. E. Purdie, Principal of Western Bible College at Winnipeg, Manitoba, consented to come down to this Camp Meeting, and speak in the Council Meeting on behalf of a School of this nature. He endorsed it heartily, and offered two full years of his Course of Study, which included books, notes, etc., for our School to use. This is considered the finest set of notes that could be obtained anywhere. For this great favor we agreed to encourage our students to attend Western Bible College for their third year.

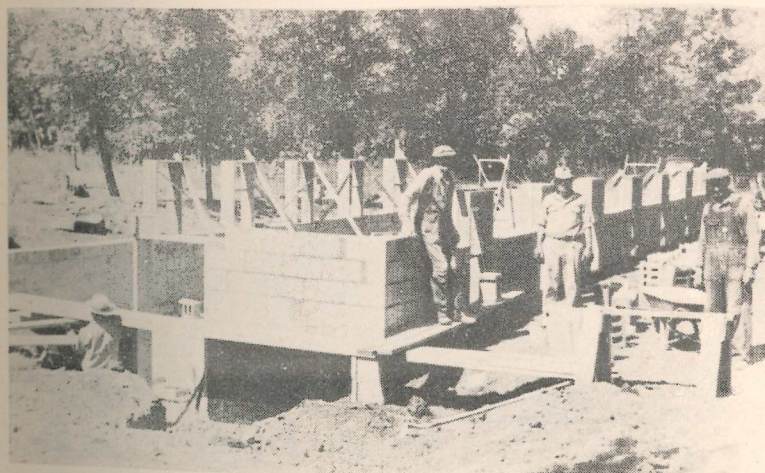

We very much appreciate the fine help and encouragement that Dr. Purdie has been to the School.

Construction was started immediately. Two basements were dug, and cement blocks were used in building these basements. A large basement, 68X26 feet, was dug for the building from Egeland, and one, 28X28 feet, was dug for the building from Egeland, or rather, Leeds.

At present, the large building is only 54X26, but we plan to build an addition to this soon, for more dormitory space.

ONE OF THE LARGE CISTERNS

THE ACTUAL BUILDING IS STARTED

The building moved in from Leeds is used to house the boys dormitory, one apartment, a chapel in the basement, also used for classroom.

Two large cisterns, one twelve feet deep and fifteen feet in diameter, and one twelve feet deep and ten feet in diameter, were also constructed, as the water supply presented a major problem, and this temporarily met the need.
