In spite of the hardships and privations of those early months and years, the blessings of God were evident from the very beginning. The school was opened to instruct our young people in the precious truths of God's Holy Word. During the course of her ten years she has had her share of problems and difficulties. She has had, perhaps, even more than her share of triumphs and blessings. A goodly number of her students have found their places in full time gospel service as ministers and missionaries. Many others have gone forth to be a greater and more efficient blessing in their home churches and in other realms of usefulness. It has come to be our firm conviction that, whatever one's future holds, a knowledge of God's Word is most vital. In addition to this, a good number of happy Christian homes have been formed through the associations of young people with each other in the wholesome atmosphere of a Christian school.

With the passing of the years have come many and much needed improvements on the building and campus. We have rejoiced to see these improvements. It has been a greater source of delight, however, to see the improvement in the minds, hearts and lives of all who have been touched by the influence of our blessed school.

God holds the future. We look forward with keen anticipation to increasing fruitfulness in the years that lie ahead, should Jesus tarry. The urgent need for a thorough knowledge of the Bible increases as the end of the age approaches. It is our desire and ambition to do all within our ability to help meet this need.
